New hair-treating agent - contg. di:methyl silicone rubber, silicone oil and

volatile silicone oil A new hair-treating agent comprises a dimethyl silicone rubber of formula (I), a silicone oil of formula (II), and a volatile silicone oil of formula (III), with a (II)/(I) blend wt. ratio of (1/3) to (3/1).

CH, L

R1 and R2 = methyl or OR; In (1) n = 4000-9000,

CH, \$i-0 (111) In (II) n = 30-300, and CH, $\ln (III) n = 3-7.$ The agent is pref. nonsqueous.

USE/ADVANTAGE

The agent imparts good smoothness and glossiness to the hair and protects the hair from heat and brushing.

(I) and (II) are commercially available. The blend ratio

of (I)is usually 1-20 wt. %.

(III) includes octamethylcyclotetrasiloxane, decamethylcyclopentasiloxane, hexamethylcyclotrisiloxane and dodecamethylcyclohexasiloxane.

Available forms of the agent include an emulsion, a blowing agent, a treating agent, rinse, a spray and pack.

Liq. detergent compsn. with good rinsability - contg. synthetic surfactant and terpene hydrocarbon

(II)

Liq. detergent compan. comprises:
5-60 wt.4 of at least one synthetic anionic, nonionic or amphoteric surfactant (excluding soap):
0.05-5 wt.4 of a dicarboxylic acid type surfactant of

formula (I)-(III); and

0.01-3 wt. t of a mono- and sequiterpenes.

 M_1 and $M_2 = H_1$ alkali(ne earth) metal, or alkanol amine. The most preferable are those of formula (1).

USETABLANTAGE

The compsn. has good rinsability after cleaning, good detergency and good foaming power. The compsn. causes little chafing and can be used on clothes, tableware, households, hair and the body.

TERPENES

Terpenes include D- and L-limoners a- and 8-pinene and caryophyllene. (9pp

Detergent compan, which is mild to skin - comprises nonionic surfactant(s), carboxylate anionic surfactant(s) and mono:calcium cationic surfactant

A detergent compan. comprises

(A) a nonionic surfactant(s); (B) a cationic surfactant comprising an imidatoline quaternary cpd. of formula (1), and/or a cationic surfactant of formula (II);
